Making calls

Turn on the phone: Press and hold  to turn the phone on.

With the Dial Pad: Press .

Use the keyboard to type a number or tap numbers on the onscreen Dial Pad.

Press  to dial.

To create speed dial favorites:

Press . Use the 5-way navigator to highlight a favorite button and press Center to dial.

By name: Press . Press Center to open Contacts. Begin typing a first or last name or a first initial and last name to search in your Contacts. Choose a number from the results and press .

Redial: Press  three times.

Call Log: Press  twice. Then select Call Log from the recent call list. All recent incoming and outgoing calls are listed in chronological order. Select a number, and then press  to dial.

To create speed dial favorites:

Press , and then use the 5-way navigator to highlight a blank favorite. Press Center, and enter the info.

- Select Lookup to grab info from your Contacts list.
- Select More to enter Extra Digits such as passwords or extensions - digits can be set to see a list of all numbers associated with that contact.

Customize the Main View:

Press , and then . Select Options, and then select General Preferences. You can:

- Display an image as wallpaper rather than the Dial Pad.
- Select whether typing on the keyboard opens Contacts or dials numbers.
- Select whether Calendar events appear.
- Show one or two rows of favorite buttons.

Menu items: Most menu commands have keyboard shortcuts listed beside them.

Press  + shortcut letter for instant access.

Expand: Use expansion cards to expand storage space on your device. Your Treo accepts SD, SDIO, and MultiMediaCard expansion cards.

Add apps: Download compatible Palm OS® applications directly from the Internet using the built-in web browser. Highlight the download link and press Center to get the application.

Beware of magnet: The speaker on your device uses a magnet, so don't keep it near credit cards or other items sensitive to magnets.
